**SHARPSGUARD® orange** is a comprehensive range of containers for the disposal of sharps, excluding those contaminated with medicinal products and their residues.

A general purpose container that is a definite favourite throughout the hospital, in all wards and departments, as well as the community and other healthcare settings.

Our range includes the revolutionary SHARPSGUARD® EXTRA 8.5 (formerly SHARPSGUARD® 8.5), with a unique rotating chamber to help prevent the return of contents. Ideal for areas where there is high public access or where children may be present.

To ensure the containers are safe and simple to use they now come with opaque coloured doors, clearly showing when the door is in the temporary or fully closed position.

SHARPSGUARD® cyto with distinctive purple-coloured lids is a comprehensive range of containers for the disposal of sharps including those contaminated with cytotoxic and/or cytostatic medicinal products and their residues.

These containers are designed to be used throughout the hospital, in all wards and departments, as well as the community setting where cytotoxic and/or cytostatic medicines are in use

For added protection, absorbent pads are included in all containers

All containers support the new colour-coded lids and labels for ease of segregation and consignment
